MADHUR MANGAL

FORWARD DEPLOYED ENGINEER | REACT · TYPESCRIPT · NODE.JS · AI SYSTEMS

madhurmangal5@gmail.com · +91 7773005204 · GitHub · LinkedIn · Portfolio

SUMMARY

Forward Deployed Engineer and frontend-focused full-stack engineer with 4+ years of experience delivering customer-facing products across healthcare, cloud data, and retail. Combines React, TypeScript, Node.js, accessibility, product validation, and AI-enabled workflows to translate product and customer needs into production software.

SKILLS

Engineering: React, TypeScript, JavaScript, Node.js, Express, Redux, REST APIs, GraphQL, Module Federation, Webpack, AWS, CI/CD Product & AI: WCAG accessibility, validation frameworks, customer reporting, agent creation & orchestration, agent skills & plugins, MCP, Claude Cowork, Hugging Face, Mastra.ai

EXPERIENCE

INNOVACCER | Forward Deployed Engineer (FDE) / Software Development Engineer I | Noida, India | Sep 2025–Present

- Build and scale P360, a patient platform supporting critical healthcare data workflows across provider organizations.
- Develop an accessibility-as-a-service capability with practical implementation guidance, product-boundary checks, persistent error logs, and reusable review practices for accessibility engineering.
- Create a product testing and validation framework that uses observed results and feedback to iteratively improve coverage and validation quality.
- Build customer SLA reporting workflows with an agent that prepares reports and supports follow-up, helping reduce manual reporting effort and improve SLA visibility.
- Contribute to a Module Federation architecture for independently deployable micro-frontends; audited four repositories and resolved 52% of 273 WCAG 2.2 issues.
- Address performance bottlenecks and memory leaks in patient data views; built a reusable React preview component for documents, images, video, and audio.

CLOUDSUFI | Fullstack Software Engineer, Google Dataplex | Remote, India | Jan 2025–Sep 2025

- Built Google Dataplex, a data governance and management product, from the ground up as lead frontend engineer in collaboration with Google product, UX, and technical stakeholders.
- Architected Node.js middleware for REST API orchestration, authentication, and data transformation between the application and Google Cloud services.

COMMERCEIQ | Software Development Engineer UI | Bengaluru, India | Aug 2023–Jan 2025

- Led advertising campaign management for Walmart and Target, contributing to an 80% contract renewal rate; delivered Amazon and Walmart campaign creation features supporting 120% customer-base expansion.
- Earned the Delivery Ninja Award for delivery supporting CommerceIQ's Walmart ad-tech partnership.

CAPGEMINI ENGINEERING | Associate II Software Engineer | Gurugram, India | Jan 2022–Jul 2023

- Migrated 70% of IBM Spectrum Scale GUI from Dojo to React and integrated FluentUI; built pause/resume backup state management that delivered a 2× performance improvement.

PROJECTS

Problem-to-Agentic Solution Sandbox Hiring Platform | In progress; deployment link forthcoming — A hands-on hiring platform where candidates turn real problems into agentic solutions, bridging AI fundamentals with practical agent building.

Investment Market Macro-Factor Model | In progress; deployment link forthcoming — Analyzes macro factors using supplied market data and iteratively refines outputs through MCP-connected workflows informed by investor input.

Agentic Council Framework | Live demo — Explores a multi-agent council that gathers and synthesizes perspectives into a response, inspired by Perplexity's Council feature.

EDUCATION

The LNM Institute of Information Technology, Jaipur | B.Tech, Computer Science and Engineering | 2018–2022
